| 5. | Title, number of pages and language(s) of the notified document: Draft Commission Delegated Regulation amending Regulation (EU) 2017/745 of the European Parliament and of the Council, as regards the assignment of Unique Device Identifiers for spectacle frames, spectacle lenses and ready-to-wear reading spectacles; (7 page(s), in English) |
| 6. | Description of content: The proposed Regulation is a Delegated measure adopted pursuant to Article 27(10)(b) of Regulation (EU) 2017/745 on medical devices, whereby the Commission is empowered to amend Annex VI to that Regulation in light of international developments and technical progress in the field of Unique Device Identification (UDI). In order to resolve the implementation issue concerning the registration of UDI device identifiers ("UDI-DI") data elements in the European database on medical devices ("Eudamed") for highly individualised devices, and in particular spectacle frames, spectacle lenses and ready-to-wear reading spectacles, the Commission is empowered to establish a specific UDI-DI assignment rule for such devices. This solution will allow a more effective implementation of the UDI system at European level. |

擬議的法規是一項根據《歐盟醫療器材法規》(EU) 2017/745 第 27(10)(b) 條所採納的授權措施，賦予歐盟委員會權力，以根據國際發展和單一器材識別 (UDI) 領域的技術進展，修訂該法規的附件 VI。

為了解決在 歐盟醫療器材數據庫 (Eudamed) 中註冊 UDI 器材識別碼 (UDI-DI) 資料元素時，與高度個別化器材 (特別是眼鏡框、眼鏡鏡片及成品老花眼鏡) 相關的執行問題，委員會被授權為此類器材制定特定的 UDI-DI 指派規則。

此解決方案將有助於在歐盟範圍內更有效地執行 UDI 系統。

- 7. Objective and rationale, including the nature of urgent problems where applicable:** Regulations (EU) 2017/745 on medical devices and (EU) 2017/746 on *in vitro* diagnostic medical devices introduced the Unique Device Identification (UDI) system, aiming at ensuring an adequate level of traceability with respect to medical devices and *in vitro* diagnostic medical devices.

The UDI system comprises UDI device identifiers (UDI-Dis) and UDI production identifiers (UDI-Pis), which shall be assigned (in compliance with the rules of the designated issuing entities) by manufacturers to all devices, other than custom-made devices, prior to the placement on the market.

To further strengthen and enhance traceability and recording of UDIs, manufacturers have the obligation to report the UDI in the European database on medical devices (Eudamed).

However, for certain devices characterised by a high level of individualisation ("highly individualised devices"), a high variety of types and possible clinical parameters combinations would result in the assignment and reporting of a disproportionately high number of UDI-DIs for the same device model, with very limited value for regulatory purposes.

Regulation (EU) 2017/745 does not provide for the possibility to exempt the manufacturers from the obligation of reporting UDI-DIs to Eudamed. Therefore, in order to resolve such implementation issue and limit the UDI-DI data entries in Eudamed, it is necessary to elaborate a solution that allows the grouping of highly individualised devices presenting specific similarities with respect to defined clinically relevant parameters under a same UDI-DI identifier (the "Master UDI-DI").

The Master UDI-DI solution is currently implemented for contact lenses (according to Commission Delegated Regulation (EU) 2023/2197 of 10 July 2023 amending Regulation (EU) 2017/745 of the European Parliament and of the Council, as regards the assignment of Unique Device Identifiers for contact lenses, OJ L, 2023/2197, 20.10.2023, ELI: http://data.europa.eu/eli/reg_del/2023/2197/oj) and it is intended to be implemented for spectacle frames, spectacle lenses and ready-to-wear reading spectacles as well.; Protection of human health or safety

Description: In this [document](#), the Federal Communications Commission (Commission or FCC) expands unlicensed very low power (VLP) device operation to the entire 6 gigahertz (GHz) band (5.925-7.125 megahertz (MHz)). The VLP devices will operate with the same power levels and other technical and operational requirements that apply to VLP devices in the U-NII-5 (5.925-6.425 MHz) and U-NII-7(6.525-6.875 MHz) portions of the 6 GHz band. These technical and operational requirements are designed to prevent the licensed services that operate in the 6 GHz band from experiencing harmful interference. The Commission's actions will provide additional spectrum for high-throughput, low latency operations for these versatile portable devices.

This final rule is effective 5 May 2025.

Description: In this [document](#), the Federal Communications Commission (Commission) implements certain provisions of the Launch Communications Act ([LCA](#)) enacted 26 September 2024, governing the authorization and facilitation of commercial space operations in the 2025-2110 MHz, 2200- 2290 MHz, and 2360-2395 MHz bands (collectively, the LCA bands). To meet this statutory mandate, the Commission builds upon its action in the September 2023 Second Report and Order which, among other things, reallocated the 2025-2110 MHz and 2200-2290 MHz bands for non-Federal Space Operation on a secondary basis and adopted, for these two bands, space launch licensing framework. Specifically, the Commission reallocates the 2360-2395 MHz band on a secondary basis for Space

Operation. Next, the Commission incorporates the 2360-2395 MHz band into its existing part 26 space launch regulatory framework that includes, for example, space launch licensing and frequency coordination rules. In order to protect critical Federal and non-Federal flight testing operations, we incorporate into our certain technical rules from our current. Finally, the Commission confirms that the specific licensing, registration, frequency coordination, and frequency coordinator selection procedures, to be refined by the Wireless Telecommunications Bureau (Bureau or WTB) on delegated authority, will apply to the LCA bands.

The rules are effective 7 April 2025, except for amendatory instruction 9 (adding Sec. 26.202(d)), which is indefinitely delayed. The Federal Communications Commission will publish a document in the Federal Register announcing the effective date of this rule section.

<https://docs.fcc.gov/public/attachments/FCC-24-132A1.pdf>

This final rule is identified by [ET Docket No. 13-115](#) and [FCC 24-132](#). The Docket Folders are available on the FCC's website (links above) and provide access to associated documents. Comments are accessible from the FCC's Electronic Comment Filing System ([ECFS](#)) at [https://www.fcc.gov/ecfs/search/search-filings/results?q=\(proceedings.name:\(%2213-115%22\)\)](https://www.fcc.gov/ecfs/search/search-filings/results?q=(proceedings.name:(%2213-115%22))).

這份文件中，聯邦通信委員會（FCC）實施了2024年9月26日生效的《發射通信法案》（LCA）中的某些條款，該法案規範了在2025-2110 MHz、2200-2290 MHz 和 2360-2395 MHz 頻段（統稱為LCA頻段）中商業太空操作的授權和促進。為了履行這一法定使命，FCC 基於其2023年9月的《第二報告與命令》中的行動，重新劃分了2025-2110 MHz 和 2200-2290 MHz 頻段，將其用於非聯邦太空操作（以次要使用的方式），並為這兩個頻段採用了太空發射許可框架。具體來說，FCC 將2360-2395 MHz 頻段以次要方式劃分為太空操作頻段。接著，FCC 將2360-2395 MHz 頻段納入現有的第26部分太空發射規範框架中，這包括太空發射許可和頻率協調規則等。為了保護關鍵的聯邦和非聯邦飛行測試操作，FCC 將現行的某些技術規則納入其中。最後，FCC 確認，無線電通信局（WTB）將根據授權進行的具體許可、註冊、頻率協調和頻率協調員選擇程序將適用於LCA頻段。

該規則將於2025年4月7日生效，但修改指令9（添加第26.202(d)條）的生效日期將無限期延遲。聯邦通信委員會將在《聯邦公報》上發布公告，宣佈此規則條款的生效日期。
