BUREAU OF STANDARDS, METROLOGY AND INSPECTION
MINISTRY OF ECONOMIC AFFAIRS
REPUBLIC OF CHINA

PREFACE

The Bureau of Standards, Metrology and Inspection (BSMI) under the Ministry of Economic Affairs (MOEA) is the authority responsible for the establishment and promotion of National Standards of the Republic of China (CNS) in Taiwan. In addition to standardization, the activities of the BSMI encompass verification of weights and measuring instruments, inspection of commodities.

CNSI Standards are criteria that manufacturers rely on to produce and sell their products. They are also used for mandatory inspection of products. The BSMI is active in harmonizing CNS Standards with international standards in order to reduce technical barriers and liberalize trade. CNS Standards are established by consensus and approved by MOEA to provide common and repeated use, rules, guidelines or characteristics for products, processes and service. CNS Standards are implemented on a voluntary basis ascribed to the Standards Act. CNS Standards are drafted on request from any industry, academic associations, interested parties and etc. When they are drafting, relevant international standards and related foreign standards are referenced. The drafts will be evaluated by considering fundamental climatic, geographical or technological factors and are circulated for comments. The CNS Technical committees, comprised of representatives from the related interested parties, experts, manufacturers, academic and governments, are convened to review the contents and prepare final drafts. Then, final drafts are reviewed by a Review Council. If they are approved, they are promulgated as National Standards of the Republic of China.

As of February 2017, the number of current CNS Standards in Chinese amounts to 14,367. To keep the content of standards current, CNS Standards are amended, confirmed or withdrawn every five years or when necessary. Up to February 2017, there are 2,175 CNS Standards in English version available.

To facilitate the public to access the CNS Standards, the BSMI provides the CNS Online Service (<http://www.cnsonline.com.tw>). Information provided by this system includes full text of CNS Standards, titles of publications, applicable scope, newly developed CNS Standards, revision and withdrawal of CNS Standards, etc. Downloading or printing the full text of CNS Standards would be charged, while previewing the full text of CNS Standards is at no charge.
