Amendments to the Legal Inspection Requirements for Printing or Copying Machines and 30 Other Commodities

By the Bureau of Standards, Metrology and Inspection (BSMI), Ministry of Economic Affairs (MOEA)

Introduction:
BSMI will adopt the newest version of the electrical safety specifications, electromagnetic compatibility and related inspection standards, CNS 15598-1: 2020 and CNS 15936: 2016 to bring our regulations into line with the international standards to ensure consumers’ safety.
In addition, CNS 15598-1:2020 was also revised to meet the ratification requirements of the Minamata Convention on Mercury to address the threat to human health and the environment.

Date of implementation: 1 January 2024

Scope of covered products:

Description of the two kinds of conformity assessment procedures

1. **Registration of Product Certification (RPC) Scheme: Modules II+III**

   Under the II+III combination of modules used in this scheme, domestic manufacturers or importers must have their products type-tested in advance (Module II) by the BSMI or BSMI-designated testing laboratories before applying for registration of their products. Manufacturers or importers will also be required to ensure by declaration (Module III, conformity-to-type declaration) that all products made at
their manufacturing facilities or imported are in conformity with the prototypes submitted for type-test at Module II stage.

2. **Type-Approved Batch Inspection (TABI) Scheme**

   Under this procedure, manufacturers or importers shall have their products type-tested by the BSMI or BSMI-designated testing laboratories, and file an application for Type Approval to the BSMI or its branches.

   After manufacturers or importers obtain a Type Approval certificate, they are required to file an application for batch inspection to the BSMI each time before their products are released from the production premises or arrive at the port of entry. The BSMI will then review the application and the related documents while additional samples may be required for further testing if it is deemed necessary.

   After the products have passed the inspection, they will be allowed to use the Commodity Inspection Mark with the letter ‘T’ and the identification number given by the BSMI. The application fee for the Type Approval is NTS3,500, and a Type Approval certificate is valid for three years. The fees for type testing vary by products and depend on the fee policies of the testing laboratories.

3. **Declaration of Conformity (DoC) Scheme**

   The manufacturer or importer shall obtain test repost from a BSMI-designated laboratory, prepare relevant technical documents, and shall draw up a Declaration of Conformity. Both the technical documents and Declaration of Conformity shall be kept by the manufacturer or importer for an applicable period.

   The manufacturer or importer shall apply to the BSMI or its branch for registration and a registration number for the DoC marking.

   The DoC marking printed by the manufacturer or importer must be affixed to the body of the products.

4. **Further information about the three schemes is also available on the BSMI website at**

   https://www.bsmi.gov.tw/wSite/lp?ctNode=9768&CtUnit=4132&BaseDSD=7&mp=2

**Locations to apply for Registration of Product Certification or Type-Approved Batch Inspection:**
The BSMI or its branches.

**Time required for Registration of Product Certification:**
14 working days. (This period does not include the time for corrective actions by the applicant due to deficiencies in the documents or samples. Extra seven working days may be required if additional tests are required.)

**Related requirements:**
1. The revised inspection standards listed in the table will come into force on the date of announcement and the current inspection standards will become invalid from 1 January 2024. The applicable inspection schemes, conformity assessment modules of RPC and duration of certificates for the commodities above will remain unchanged. For a commodity described in a declaration of conformity declaration of conformity will be invalid from 1 January 2025 if declaration of conformity are not updated according to the revised inspection standards before 31 December 2024.

2. The gateway of item 29 will be subject to mandatory inspection from 1 January 2024.

3. The column of import regulation codes 8471.90.90.00.6, 8472.90.50.00.3, 9017.10.10.00.9 and 9017.20.10.00.7 will be changed to C02 since the announcement date.

4. The National Certification Bodies (NCBs) and their associated CB Testing Laboratories (CBTLs) under IECEE CB Scheme are allowed to apply for registration to the BSMI. Testing report(s) and certificate(s) issued by the registered NCBs and CBTLs may be transferred to the BSMI required test report(s) by the
BSMI-designated domestic laboratories according to the related procedures.

5. From the date of announcement, the BSMI can accept applications for registration of product certification and type approval of listed products. BSMI will issue RPC or type approval certificates to the applicants whose products meet all the requirements. For products included in the inspection scope for the first time, the certificate is valid for three years from the date of issuance (if the date of issuance is before 31 December 2023, it will be counted from 1 January 2024).

6. Those commodities using AC power source, rechargeable lithium batteries or affixed power altering devices shall be conformed to safety testing requirements CNS 15598-1.

7. The listed products use button-type batteries to provide power shall comply with the relevant provisions of the CNS 15598-1 standard for button-type batteries.

8. The listed products with personal music players features must comply with section 10.6 of CNS 15598-1.

9. The listed products with electronic displays features must comply with the provisions of section 7.2 of CNS 15598-1: 2020.

10. For the requirement of Section 5 “Marking of presence” of CNS 15663, the certificate holders of the commodities shall clearly mark the presence condition of the restricted substances on the body, packages, stickers, or the instruction books of the commodities. Those who utilize website as a means to announce the presence condition of the restricted substances of the commodities shall clearly mark the website address on the body, packages, stickers, or the instruction books of the commodities, instead.

11. The Commodity Inspection Mark:

   (1) The Commodity Inspection Mark shall be printed by the certificate holders. The identification number of the Commodity Inspection Mark consists of “Letter (R or T),” “Designated Code (five digits)” and the presence conditions of the restricted substance (e.g., RoHS or RoHS (XX,XX)).

   (2) The identification number shall be placed below or to the right of the graphic symbol and the presence conditions of the restricted substance shall be indicated in the second row.

   (3) The size of the Mark can be applied proportionally on a prominent location of the commodities. The Mark shall use materials that are not easily altered, and the content shall be in a clearly identifiable and indelible form affixed permanently to the commodity.

   (4) For RPC scheme, the examples of the Commodity Inspection Mark are listed below:

   (5) For TABI scheme, the examples of the Commodity Inspection Mark are listed below:

   (6) “RoHS” indicates the content of restricted substance(s), other than exemptions stated in CNS 15663, does not exceed the reference percentage value of presence condition.

   “RoHS (XX,XX)” indicates the content of restricted substance(s) (element XX, element XX, …), other than exemptions stated in CNS 15663, exceeds the reference percentage value of presence condition.

   The restricted substances: indicates Pb, Cd, Hg, Cr\(^{6+}\), PBB, and PBDE.
Example:

- RoHS (Pb): indicates that the Pb percentage content in certain parts of the commodity exceeds the reference percentage value of presence condition.
- RoHS (Cd, Cr$^{+6}$, PBB): indicates that the Cd, Cr$^{+6}$, and PBB percentage content in certain parts of the commodity exceed the reference percentage value of presence condition respectively.

12. The C.C.C. Code listed in the table are used for reference only. The commodity shall still comply with the requirements before entering into the market, even though its C.C.C. Code is identified differently by the Customs Administration, Ministry of Finance or Bureau of Foreign Trade, Ministry of Economic Affairs.

13. The inspection standards of the commodities listed in the table shall be the version published in this announcement. If any updated version is available, the BSMI shall publish the implementation date of the updated version in further announcements.

14. Commodities with combined features or multifunctional products shall comply with the respective inspection standards.

15. The medical equipment described in the table indicates the medical equipment regulated under the Pharmaceutical Affairs Act.

16. The telecommunications terminal equipment mentioned in the table is the telecommunications terminal equipment regulated under in the Telecommunications Act.

17. The listed commodities that have obtained the vehicle safety testing report issued by the certification institutions authorized by the Ministry of Transportation and Communications are not within the scope of the inspection items required by the BSMI.
